

ナット研究員がFalling Walls Lab 2016 Sendaiの3rd PLACE賞を受賞しました(2016/09/09)

テーマ: Research presentation, Tsunami evacuation, Young researchers

場所: 東北大学 知の創出センターTohoku Forum for Creativity, Tohoku University

On September 9, 2016, Researcher Dr. Natt Leelawat from Tsunami Engineering Laboratory participated in the *Falling Walls Lab 2016 Sendai*, the Tohoku-Japan qualifiers for the prestigious Falling Walls Lab competition. Falling Walls Lab is an international research presentation competition for innovative young researchers to convey their idea in a 3-minute presentation including the Q&A part.

Dr. Natt Leelawat won the 3rd PLACE Award from this competition. His presentation titled “*Breaking the Wall of Tsunami Evacuation*” was about a research related to the mobile application to estimate the building damage from a tsunami disaster. This research has been collaborated with Prof. Fumihiko Imamura, Assoc. Prof. Anawat Suppasri, Research Associate Yoshi Abe, and Researcher Dr. Panon Latcharote from IRIDeS; Prof. Junichi Iijima and Asst. Prof. Jaehyun Park (Tokyo Institute of Technology); and Dr. Ingrid Charvet (University College London).

Dr. Natt Leelawat will be one of the three winners from Sendai to join winners from other international Labs around the world for the Falling Walls Lab Finale in Berlin, Germany, on November 8, 2016.
